## SUMMARY

AI and Data Analytics professional with dual Master's degrees in Computer Science and Business Analytics. Experienced in building machine learning systems, generative AI applications, predictive analytics solutions, and scalable data pipelines across industry-sponsored consulting projects, research, and enterprise environments. Skilled in Python, SQL, LLMs, RAG architectures, machine learning, and data engineering, with a proven ability to translate complex technical insights into actionable business recommendations and lead cross-functional teams.

## EDUCATION

|                                                                                                                                                |                                                |
|------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| <b>California Polytechnic State University, San Luis Obispo, CA</b><br>Master of Science in <b>Business Analytics</b>                          | <b>Aug 2025 - Jun 2026</b><br>GPA: <b>3.81</b> |

## SKILLS

- **Languages:** Python, SQL, Java, C/C++, Bash
- **Gen AI & LLMs:** RAG, Prompt Engineering, Vector Search, LLM APIs, Agent-Based Systems
- **ML/AI:** PyTorch, TensorFlow, Scikit-learn, MARL, HMM, Optimization
- **Visualization:** Tableau, Power BI, Matplotlib
- **Cloud & Tools:** AWS (EC2, S3, Lambda), Git, Jupyter, Docker
- **Databases:** MySQL, MongoDB, DynamoDB

## CERTIFICATIONS

- IBM Data Science Professional Certificate (Coursera), Oct 2024
- AWS Academy Graduate – Cloud Architecting (Training Badge), Mar 2026

## RESEARCH & PROJECTS

### Jarvis AI Assistant (RAG + Agent-Based GenAI System)

Apr 2026 - Present

- Built an enterprise-style AI assistant leveraging LLMs and Retrieval-Augmented Generation (RAG) to deliver context-aware responses from custom knowledge bases.
- Designed end-to-end ingestion pipelines transforming unstructured documents into searchable vector embeddings.
- Implemented semantic search, retrieval ranking, and prompt engineering workflows to improve answer relevance.
- Developed modular backend services enabling scalable integration of additional AI agents and business workflows.
- Applied software engineering best practices including version control, modular design, and reproducible deployment pipelines.

### Graduate Researcher – Multi-Agent Reinforcement Learning & Ethical AI

Oct 2025 – Present

California Polytechnic State University, San Luis Obispo

- Developing MARL environments modeling strategic and ethical decision-making.
- Implementing self-play, curriculum learning, and game-theoretic reward structures.
- Building reproducible experimentation frameworks for large-scale simulation analysis.

### AI Content Crafter

- Built an AI-powered content generation system leveraging natural language processing and large language models.
- Implemented data preprocessing, prompt engineering, and evaluation workflows.
- Designed a modular, reproducible codebase with version control and documentation.

### LLM Performance Enhancement for Non-Latin Scripts

- Improved multilingual model performance through custom preprocessing and tokenization strategies.
- Achieved measurable accuracy improvements across non-Latin language datasets.

### Relational Database System Implementation

- Developed a Python-based relational database engine supporting joins, indexing, and query execution.
- Applied data modeling and optimization techniques using real-world IMDB datasets.

## LEADERSHIP & INVOLVEMENT

University of Southern California | Los Angeles, CA

Jan 2024 – May 2024

Teaching Assistant - CS@SC

California State University, Fresno | Fresno, CA

Aug 2019 – Dec 2021

Founder, President & Vice President - Computer Science Club
